

Guide for Discussion on Current Practices

Ask the participants about the different procedures and practices adopted for client care during first contact at the hospital like:

1. How do they assess client condition?
2. How is PV examination conducted at your facility? Steps followed during PV examination.
3. What are the important conditions they screen their client for during her visit?
4. How do they involve birth companions in the client care process?
5. When do they shift client to the labour room?
6. Where all the procedures associated with childbirth happen at their facility?
7. What all are the preparations done by staff before delivery in labour room?
8. How do they conduct delivery and perform newborn care?
9. What are all the essential actions undertaken by the staff after delivery for mother?
10. What are all the essential actions undertaken by the staff after delivery for newborn?
11. When is mother shifted from labour room to ward?
12. What are the essential actions performed before discharge?
