Government of India

Message

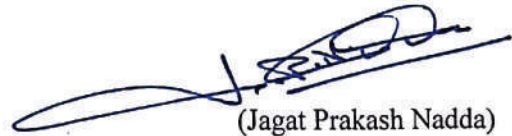

Keeping in view the honourable Prime Minister's vision of 'Transforming India by 2022', Union Government has taken a major policy initiative for the rapid transformation of 101 aspirational districts that were lagging on specific development parameters, including Health & Nutrition.

The Ministry of Health and Family Welfare, Government of India, is committed to enhance the quality of health care programmes and services in these aspirational districts. Districts would be supported for streamlining the existing healthcare delivery processes along with establishing newer mechanisms for achieving the objectives under this transformational program. I am also aware that improved co-ordination among different sectors and stakeholders will be vital for overcoming the challenges and I solicit full cooperation and commitment from each stakeholder.

In this regard, the Ministry has developed 'Health Atlas' which provides easy accessible figures pertaining to all the key indicators important for monitoring and evaluating the performance. It will raise public and professional awareness of the inadequacies of the existing health resources and the large inequities in their distribution at all levels. This data-rich tool will indeed be useful in planning for making health care services more accessible, affordable and equitable in these 101 aspirational districts.

I urge all the states to make full use of this tool so that rapid transformation in these aspirational districts can be achieved and the Country can march with full confidence towards Sustainable Development Goals. I am convinced that the Health Atlas will prove to be extremely useful to guide the aspirational districts for accelerated improvement in health & nutritional outcomes.

I wish for success of the programme.

FOREWORD

Recent shift towards Universal Health Coverage has resulted in significant improvements in both maternal and infant mortality in the country. The progress though impressive has not been even across the country and there are significant inter-state and intra-state variation. Many districts lag behind National averages in performance in the Health, Education and Socio Economic sectors and are an impediment in improving the Human Development Index of the Nation.

There is an urgent need to transform the laggard districts rapidly to bring about balanced and inclusive growth in the country. In this context NITI Aayog has identified 101 Aspirational districts. The districts have been identified using a composite index that includes indicators related to health, nutrition, education, electrification, employment, agriculture, and infrastructure.

Since Health and Nutrition status are among critical determinants for scoring and ranking districts, it is imperative that these districts should be periodically reviewed on key indicators and focused interventions be planned so that rapid transformation can be achieved by 2022 in these districts.

The Government of India has prepared a Health Atlas that provides each district's health statistics at a glance. It compiles the latest available indicator values from National Health and Family Survey (NFHS 4), Census, the Sample registration system and State Program data for each of the 101 aspirational districts. The Atlas includes information on demography, health infrastructures, human resources for health and status of key health indicators. It is a ready resource for planners, managers and implementers.

The atlas not only provides a snapshot of the current state of healthcare and challenges in the districts but also explore strategic plans for achieving the aspiration of health for all. I am hopeful that this Health Atlas will prove to be a useful tool for planning and monitoring as well as tracking the progress in the aspirational districts for district authorities and other stakeholders. I earnestly hope that the health atlas would enable us in formulating, designing and monitoring key interventions for rapid progress of the aspirational districts as envisaged by the honourable Prime Minister of India.

GOVERNMENT OF INDIA
MINISTRY OF HEALTH & FAMILY WELFARE
NIRMAN BHAVAN, NEW DELHI - 110011

PREFACE

India has shown tremendous reduction in the Key health indicators like Infant Mortality Rate and Maternal Mortality Ratio in the decade after the introduction of National Health Mission. Maternal Mortality Ratio (MMR) has reduced from 310 (2001-03) to 167 (2013) per 100,000 Live Births whereas between, 2001 and 2016, the Infant Mortality Rate has reduced from 66 to 34 per 1000 Live Birth. The Government of India is committed to the Sustainable Development Goals, to bring down Maternal Mortality Ratio to less than 70 by 2030 and preventable under five deaths to as low as 25 per 1000 live births by 2030.

The Government of India has various initiatives that aim to improve the health outcomes in the country. However, there is uneven development across states and districts, many districts are lagging behind on health, education, and socio-economic development indicators when compared to National averages and other districts. Committed to bring about balanced and inclusive growth of the country, NITI Aayog has identified 101 Aspirational districts, for urgent attention to accelerate the pace of socioeconomic development.

It is time to review our health programs and establish the status of key health indicators that will be used for monitoring these districts. The Health Atlas of 101 districts is a step in this direction. This Health Atlas includes all the essential information i.e. Demography, Infrastructure, Human Resource, and Status of Key NFHS-4 indicators.

I am hopeful that this Health ATLAS will help all the key stakeholders in planning as well as monitoring for these 101 districts in their march towards improving health outcomes and overall human development. The NHM is committed to providing all necessary support for improving health indicators in these Aspirational Districts and thereby contribute towards their rapid transformation.

I extend my best wishes and support to this new and significant initiative and urge the States to intensify their efforts towards the achievement of the rapid transformation of these aspirational districts in order to achieve the vision of the Hon'ble Prime Minister of India.

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
1	Percentage of Pregnant Women (PW) receiving four or more Ante-Natal Care (ANC) check-ups	76%	Vizianagaram (70%)	<ul style="list-style-type: none"> • Ensure availability and use of Urine pregnancy kit for early detection of pregnancy by ASHA. • Follow up and tracking of all mothers by ASHA using MCTS – denominator based monitoring. • Improve implementation of PMSMA and PMMVY. • Ensure regular VHNDs – microplanning at all VHNDs with availability of essential services, commodities and desired facilities.
2	Percentage of institutional deliveries	91.6%	Vizianagaram (90.7%)	<ul style="list-style-type: none"> • Improve registration under RCH portal with birth preparedness plan for all pregnant women. • Improve community/client awareness on entitlements under and implementation of JSSK/PMMVY/JSY. • Improve quality of care and ensure respectful maternity care, including provision of Birth companion.
3	Anemia in Pregnant women	53%	YSR District, Kadapa (59%)	<ul style="list-style-type: none"> • Line-listing of all pregnant women with severe anemia. • IV Iron to be provided under supervision. • Ensure IFA supplementation to all pregnant women.
4	Percentage of new-borns breastfed within one hour of birth	40.1%	YSR District, Kadapa (39.3%)	<ul style="list-style-type: none"> • Ensure counselling and support to mothers for breastfeeding promotion during ANC period as part of Birth preparedness. • Staff sensitisation and capacity building at all delivery points. • Ensure presence of birth companion and trained labour room staff to support mothers for early initiation of breast feeding. • Ensure effective implementation of IMS act – Infant Milk Substitute act and Baby Friendly Hospitals.

Andhra Pradesh

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
5	Percentage of stunted children under 5 years	31%	Vizianagaram (37%), YSR District, Kadapa (36%)	<ul style="list-style-type: none"> • Ensure registration of all under five children in AWC. • Monthly weight recording of children at AWC on MCP card for detection of growth faltering and counselling of caregivers. • Implement Home based care of young child to improve complementary feeding. • Detection of children with growth and development delays and deficits and their referral as appropriate. • Micronutrient supplementation (IFA, Calcium and Vitamin A and deworming).
6	Percentage of Severe Acute Malnutrition	5%	Vizianagaram (5%), YSR District, Kadapa (6%)	<ul style="list-style-type: none"> • Screen children for SAM using MUAC or WHZ as defined per protocol. • For all SAM children, identify cases with complications or failure of appetite test for immediate referral to Nutritional Rehabilitation Centres (NRCs) for inpatient care to Severe Acute Malnourished (SAM). • For all SAM cases without complications, provide community based management of SAM as per protocol. • Ensure strong coordination between NRCs and Community-based Management of SAM sites to ensure that no cases are lost during referrals or lost to follow-up.
7	Percentage of Moderate Acute Malnutrition (MAM)	17%	Vishakhapatnam (17%), Vizianagaram (19%), YSR District, Kadapa (18%)	<ul style="list-style-type: none"> • Screen children for SAM or MAM using middle upper arm circumference (MUAC) or Weight for Height Z-score (WHZ) as defined per protocol. • For children with MAM, provide double ration as per ICDS norms or appropriate hygienic energy dense food. • Identify the MAM child within in the AWC/ASHA network and provide special monthly follow-up for six months to ensure healthy growth and recovery.

Andhra Pradesh

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
8	Percentage of children fully immunized (9-11 months) (BCG+ DPT3 + OPV3 + Measles1)	65.3%	Vizianagaram (49.3%), YSR District, Kadapa (65.3%)	<ul style="list-style-type: none"> • Ensure vaccine availability and development of microplan using MCTS. • Special camp for reaching unreached children. • Engage all sectors in immunization activities. • Address vaccine hesitancy in selected population groups.
9	Other Priority Interventions			<ul style="list-style-type: none"> • Strengthen care around birth through LaQshya strategy and improve practices in labour room and SNCUs. • Health & Wellness Centres under Ayushman Bharat to be established on priority in aspirational districts by June 2018. • Ensure essential Drugs & Diagnostics free of cost in public health facilities. • Improve convergence between ASHA, ANM and Anganwadi Worker. • Strengthen monitoring – Use Data for evidence based action – particularly use HMIS data to identify low performing blocks using standard Health score card developed by MOHFW.

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
1	Percentage of Pregnant Women (PW) receiving four or more Ante-Natal Care (ANC) check-ups	47%	Dhubri (26%), Hailakandi (35%), Udalguri (37%), Darrang (40%), Goalpara (42%)	<ul style="list-style-type: none"> • Ensure availability and use of Urine pregnancy kit for early detection of pregnancy by ASHA. • Follow up and tracking of all mothers by ASHA using MCTS – denominator based monitoring. • Improve implementation of PMSMA and PMMVY. • Ensure regular VHNDs – microplanning at all VHNDs with availability of essential services, commodities and desired facilities.
2	Percentage of institutional deliveries	70.6%	Dhubri (43.6%), Barpeta (51.9%), Hailakandi (56.5%), Darrang (66.1%)	<ul style="list-style-type: none"> • Mapping to identify pockets of high home deliveries, with especial emphasis on tribal population. • Improve registration under RCH portal with birth preparedness plan for all pregnant women. • Increase in number of delivery points, especially in areas with high home deliveries. • Improve community/client awareness on entitlements under and implementation of JSSK/PMMVY/JSY. • Improve quality of care and ensure respectful maternity care, including provision of Birth companion.
3	Anemia in Pregnant women	45%	Goalpara (66%), Dhubri, Udalguri, Hailakandi (50%), Baksa (47%)	<ul style="list-style-type: none"> • Line-listing of all pregnant women with severe anemia. • IV Iron to be provided under supervision. • Ensure IFA supplementation to all pregnant women.
4	Percentage of new-borns breastfed within one hour of birth	64.4%	Hailakandi (31.3%), Dhubri (61.6%)	<ul style="list-style-type: none"> • Ensure counselling and support to mothers for breastfeeding promotion during ANC period as part of Birth preparedness. • Staff sensitisation and capacity building at all delivery points. • Ensure presence of birth companion and trained labour room staff to support mothers for early initiation of breast feeding. • Ensure effective implementation of IMS act – Infant Milk Substitute act and Baby Friendly Hospitals.

Assam

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
5	Percentage of stunted children under 5 years	36%	Dhubri (47%), Darrang (44%), Goalpara (43%), Barpeta (42%), Udalguri (39%), Hailakandi (38%)	<ul style="list-style-type: none"> • Ensure registration of all under five children in AWC. • Monthly weight recording of children at AWC on MCP card for detection of growth faltering and counselling of caregivers. • Implement Home based care of young child to improve complementary feeding. • Detection of children with growth and development delays and deficits and their referral as appropriate. • Micronutrient supplementation (IFA, Calcium and Vitamin A and deworming).
6	Percentage of children with ARI in the last 2 weeks taken to a health facility	47%	Dhubri (37%), Baksa (42%), Goalpara (47%)	<p>Prevention of ARI</p> <ul style="list-style-type: none"> • Promotion of exclusive breastfeeding. • Vaccination against Hib, PCV, Pertussis. • Use of clean fuels for cooking – Effective implementation of Ujjawala scheme. <p>Treatment of ARI</p> <ul style="list-style-type: none"> • Promotion of Integrated Management of Neonatal and Childhood Illnesses (IMNCI) for early diagnosis and case management of common ailments of children with special emphasis on pneumonia, diarrhoea and malnutrition. • Early detection and prompt treatment at community level by ASHA workers. • Availability of antibiotics with ANM and health facilities.
7	Percentage of Severe Acute Malnutrition	6%	Dhubri (10%), Goalpara (9%), Udalguri (8%), Hailakandi, Barpeta (6%)	<ul style="list-style-type: none"> • Screen children for SAM using MUAC or WHZ as defined per protocol. • For all SAM children, identify cases with complications or failure of appetite test for immediate referral to Nutritional Rehabilitation Centres (NRCs) for inpatient care to Severe Acute Malnourished (SAM). • For all SAM cases without complications, provide community based management of SAM as per protocol. • Ensure strong coordination between NRCs and Community-based Management of SAM sites to ensure that no cases are lost during referrals or lost to follow-up.

Assam

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
8	Percentage of Moderate Acute Malnutrition (MAM)	17%	Dhubri, Goalpara (22%), Darrang, Hailakandi (19%), Udalguri (18%), Barpeta (17%)	<ul style="list-style-type: none"> • Screen children for SAM or MAM using middle upper arm circumference (MUAC) or Weight for Height Z-score (WHZ) as defined per protocol. • For children with MAM, provide double ration as per ICDS norms or appropriate hygienic energy dense food. • Identify the MAM child within in the AWC/ASHA network and provide special monthly follow-up for six months to ensure healthy growth and recovery.
9	Percentage of children fully immunized (9-11 months) (BCG+ DPT3 + OPV3 + Measles1)	47.1%	Dhubri (20.1%), Barpeta (34.1%), Hailakandi (39.2%), Darrang (40.6%), Goalpara (43.7%)	<ul style="list-style-type: none"> • Ensure vaccine availability and development of microplan using MCTS. • Special camp for reaching unreached children. • Engage all sectors in immunization activities. • Address vaccine hesitancy in selected population groups.
10	Other Priority Interventions			<ul style="list-style-type: none"> • Strengthen care around birth through LaQshya strategy and improve practices in labour room and SNCUs. • Health & Wellness Centres under Ayushman Bharat to be established on priority in aspirational districts by June 2018. • Ensure essential Drugs & Diagnostics free of cost in public health facilities. • Improve convergence between ASHA, ANM and Anganwadi Worker. • Strengthen monitoring: Use Data for evidence based action, particularly use HMIS data to identify low performing blocks using standard Health score card developed by MOHFW.

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
1	Percentage of Pregnant Women (PW) receiving four or more Ante-Natal Care (ANC) check-ups	14%	Begusarai (8%), Katihar (9%), Jamui (10%), Muzaffarpur (11%), Purnia, Gaya (12%), Sheikhpura, Khagaria (13%), Nawada (14%)	<ul style="list-style-type: none"> • Ensure availability and use of Urine pregnancy kit for early detection of pregnancy by ASHA. • Follow up and tracking of all mothers by ASHA using MCTS – denominator based monitoring. • Improve implementation of PMSMA and PMMVY. • Ensure regular VHNDs – microplanning at all VHNDs with availability of essential services, commodities and desired facilities.
2	Percentage of institutional deliveries	63.8%	Sitamarhi (37.3%), Araria (51.6%), Katihar (51.8%), Gaya (56.8%), Jamui (59.4%), Purnia (61.5%), Muzaffarpur (62.3%)	<ul style="list-style-type: none"> • Mapping to identify pockets of high home deliveries, with especial emphasis on tribal population. • Improve registration under RCH portal with birth preparedness plan for all pregnant women. • Increase in number of delivery points, especially in areas with high home deliveries. • Improve community/client awareness on entitlements under and implementation of JSSK/PMMVY/JSY. • Improve quality of care and ensure respectful maternity care, including provision of Birth companion.
3	Anemia in Pregnant women	58%	Purnia (72%), Gaya (68%), Banka, Sitamarhi (67%), Sheikhpura (61%), Katihar, Araria (58%)	<ul style="list-style-type: none"> • Line-listing of all pregnant women with severe anemia. • IV Iron to be provided under supervision. • Ensure IFA supplementation to all pregnant women.
4	Percentage of new-borns breastfed within one hour of birth	34.9%	Gaya (29%), Araria (29.6%), Begusarai (29.8%), Khagaria (32.4%), Sitamarhi, Jamui (34.4%)	<ul style="list-style-type: none"> • Ensure counselling and support to mothers for breastfeeding promotion during ANC period as part of Birth preparedness. • Staff sensitisation and capacity building at all delivery points. • Ensure presence of birth companion and trained labour room staff to support mothers for early initiation of breast feeding. • Ensure effective implementation of IMS act – Infant Milk Substitute act and Baby Friendly Hospitals.

Bihar

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
5	Percentage of stunted children under 5 years	48%	Sitamarhi (57%), Gaya (53%), Purnia (52%), Khagaria, Banka (50%), Katihar (49%), Muzaffarpur, Nawada, Aurangabad, Araria (48%)	<ul style="list-style-type: none"> • Ensure registration of all under five children in AWC. • Monthly weight recording of children at AWC on MCP card for detection of growth faltering and counselling of caregivers. • Implement Home based care of young child to improve complementary feeding. • Detection of children with growth and development delays and deficits and their referral as appropriate. • Micronutrient supplementation (IFA, Calcium and Vitamin A and deworming).
6	Percentage of children with ARI in the last 2 weeks taken to a health facility	60%	Banka (49%), Araria (52%), Jamui (56%), Muzaffarpur (56%)	<p>Prevention of ARI</p> <ul style="list-style-type: none"> • Promotion of exclusive breastfeeding. • Vaccination against Hib, PCV, Pertussis. • Use of clean fuels for cooking – Effective implementation of Ujjawala scheme. <p>Treatment of ARI</p> <ul style="list-style-type: none"> • Promotion of Integrated Management of Neonatal and Childhood Illnesses (IMNCI) for early diagnosis and case management of common ailments of children with special emphasis on pneumonia, diarrhoea and malnutrition. • Early detection and prompt treatment at community level by ASHA workers. • Availability of antibiotics with ANM and health facilities.
7	Percentage of children with Diarrhoea treated with ORS	45%	Aurangabad (16%), Muzaffarpur (30%), Sitamarhi (38%), Gaya (39%), Nawada (42%), Katihar (45%)	<p>Prevention of diarrhoea</p> <ul style="list-style-type: none"> • Promotion of exclusive breastfeeding. • Clean and potable water for drinking. • Vitamin A supplementation. • Rotavirus vaccination. <p>Treatment of diarrhoea</p> <ul style="list-style-type: none"> • Awareness on ORS and Zinc for treatment of diarrhoea. • Availability of ORS at household level through campaigns like Intensified Diarrhoea Control Fortnight.

Bihar

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
8	Percentage of Severe Acute Malnutrition	7%	Jamui, Sheikhpura (11%), Banka (9%), Gaya (8%), Khagaria, Araria, Nawada, Aurangabad (7%)	<ul style="list-style-type: none"> Screen children for SAM using MUAC or WHZ as defined per protocol. For all SAM children, identify cases with complications or failure of appetite test for immediate referral to Nutritional Rehabilitation Centres (NRCs) for inpatient care to Severe Acute Malnourished (SAM). For all SAM cases without complications, provide community based management of SAM as per protocol. Ensure strong coordination between NRCs and Community-based Management of SAM sites to ensure that no cases are lost during referrals or lost to follow-up.
9	Percentage of Moderate Acute Malnutrition (MAM)	21%	Jamui, Sheikhpura (29%), Banka, Gaya (26%), Aurangabad (25%), Araria (23%), Nawada, Katihar, Purnia (21%)	<ul style="list-style-type: none"> Screen children for SAM or MAM using middle upper arm circumference (MUAC) or Weight for Height Z-score (WHZ) as defined per protocol. For children with MAM, provide double ration as per ICDS norms or appropriate hygienic energy dense food. Identify the MAM child within in the AWC/ASHA network and provide special monthly follow-up for six months to ensure healthy growth and recovery.
9	Percentage of children fully immunized (9-11 months) (BCG+ DPT3 + OPV3 + Measles1)	61.7%	Araria (53.9%), Muzaffarpur (55%), Jamui (55.5%)	<ul style="list-style-type: none"> Ensure vaccine availability and development of microplan using MCTS. Special camp for reaching unreached children. Engage all sectors in immunization activities. Address vaccine hesitancy in selected population groups.
10	Other Priority Interventions			<ul style="list-style-type: none"> Strengthen care around birth through LaQshya strategy and improve practices in labour room and SNCUs. Health & Wellness Centres under Ayushman Bharat to be established on priority in aspirational districts by June 2018. Ensure essential Drugs & Diagnostics free of cost in public health facilities. Improve convergence between ASHA, ANM and Anganwadi Worker. Strengthen monitoring: Use Data for evidence based action, particularly use HMIS data to identify low performing blocks using standard Health score card developed by MOHFW.

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
1	Anemia in Pregnant women	38%	Kupwara (75%), Baramulla (42%)	<ul style="list-style-type: none"> Line-listing of all pregnant women with severe anemia. IV Iron to be provided under supervision. Ensure IFA supplementation to all pregnant women.
2	Percentage of new-borns breastfed within one hour of birth	46%	Kupwara (39.2%)	<ul style="list-style-type: none"> Ensure counselling and support to mothers for breastfeeding promotion during ANC period as part of Birth preparedness. Staff sensitisation and capacity building at all delivery points. Ensure presence of birth companion and trained labour room staff to support mothers for early initiation of breast feeding. Ensure effective implementation of IMS act – Infant Milk Substitute act and Baby Friendly Hospitals.
3	Percentage of stunted children under 5 years	27%	Baramulla (29%), Kupwara (31%)	<ul style="list-style-type: none"> Ensure registration of all under five children in AWC. Monthly weight recording of children at AWC on MCP card for detection of growth faltering and counselling of caregivers. Implement Home based care of young child to improve complementary feeding. Detection of children with growth and development delays and deficits and their referral as appropriate. Micronutrient supplementation (IFA, Calcium and Vitamin A and deworming).
4	Percentage of children with ARI in the last 2 weeks taken to a health facility	79%	Kupwara (77%)	<p>Prevention of ARI</p> <ul style="list-style-type: none"> Promotion of exclusive breastfeeding. Vaccination against HiB, PCV, Pertussis. Use of clean fuels for cooking – Effective implementation of Ujjawala scheme. <p>Treatment of ARI</p> <ul style="list-style-type: none"> Promotion of Integrated Management of Neonatal and Childhood Illnesses (IMNCI) for early diagnosis and case management of common ailments of children with special emphasis on pneumonia, diarrhoea and malnutrition. Early detection and prompt treatment at community level by ASHA workers. Availability of antibiotics with ANM and health facilities.

Jammu and Kashmir

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
5	Percentage of children with Diarrhoea treated with ORS	69%	Kupwara (55%)	Prevention of diarrhoea <ul style="list-style-type: none"> Promotion of exclusive breastfeeding. Clean and potable water for drinking. Vitamin A supplementation. Rotavirus vaccination. Treatment of diarrhoea <ul style="list-style-type: none"> Awareness on ORS and Zinc for treatment of diarrhoea. Availability of ORS at household level through campaigns like Intensified Diarrhoea Control Fortnight.
6	Percentage of Severe Acute Malnutrition	6%	Baramulla (8%)	<ul style="list-style-type: none"> Screen children for SAM using MUAC or WHZ as defined per protocol. For all SAM children, identify cases with complications or failure of appetite test for immediate referral to Nutritional Rehabilitation Centres (NRCs) for inpatient care to Severe Acute Malnourished (SAM). For all SAM cases without complications, provide community based management of SAM as per protocol. Ensure strong coordination between NRCs and Community-based Management of SAM sites to ensure that no cases are lost during referrals or lost to follow-up.
7	Percentage of Moderate Acute Malnutrition (MAM)	12%	Baramulla (15%)	<ul style="list-style-type: none"> Screen children for SAM or MAM using middle upper arm circumference (MUAC) or Weight for Height Z-score (WHZ) as defined per protocol. For children with MAM, provide double ration as per ICDS norms or appropriate hygienic energy dense food. Identify the MAM child within in the AWC/ASHA network and provide special monthly follow-up for six months to ensure healthy growth and recovery.

Jammu and Kashmir

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
8	Other Priority Interventions			<ul style="list-style-type: none"> • Strengthen care around birth through LaQshya strategy and improve practices in labour room and SNCUs. • Health & Wellness Centres under Ayushman Bharat to be established on priority in aspirational districts by June 2018. • Ensure essential Drugs & Diagnostics free of cost in public health facilities. • Improve convergence between ASHA, ANM and Anganwadi Worker. • Strengthen monitoring – Use Data for evidence based action – particularly use HMIS data to identify low performing blocks using standard Health score card developed by MOHFW.

Madhya Pradesh

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
1	Percentage of Pregnant Women (PW) receiving four or more Ante-Natal Care (ANC) check-ups	36%	Barwani (26%), Chhatarpur (20%), Damoh (24%), Guna (32%), Singrauli (21%), Vidisha (12%)	<ul style="list-style-type: none"> • Ensure availability and use of Urine pregnancy kit for early detection of pregnancy by ASHA. • Follow up and tracking of all mothers by ASHA using MCTS – denominator based monitoring. • Improve implementation of PMSMA and PMMVY. • Ensure regular VHNDs – microplanning at all VHNDs with availability of essential services, commodities and desired facilities.
2	Percentage of institutional deliveries	80.8%	Barwani (50.7%), Damoh (70%), Singrauli 43.5%), Vidisha (73.7%)	<ul style="list-style-type: none"> • Mapping to identify pockets of high home deliveries, with especial emphasis on tribal population. • Improve registration under RCH portal with birth preparedness plan for all pregnant women. • Increase in number of delivery points, especially in areas with high home deliveries. • Improve community/client awareness on entitlements under and implementation of JSSK/PMMVY/JSY. • Improve quality of care and ensure respectful maternity care, including provision of Birth companion.
3	Anemia in Pregnant women	55%	Barwani (69%), Guna (55%), Khandawa (63%), Rajgarh (63%), Vidisha (56%)	<ul style="list-style-type: none"> • Line-listing of all pregnant women with severe anemia. • IV Iron to be provided under supervision. • Ensure IFA supplementation to all pregnant women.
4	Percentage of new-borns breastfed within one hour of birth	34.5%	Khandwa (30.6%), Singrauli (33.5%)	<ul style="list-style-type: none"> • Ensure counselling and support to mothers for breastfeeding promotion during ANC period as part of Birth preparedness. • Staff sensitisation and capacity building at all delivery points. • Ensure presence of birth companion and trained labour room staff to support mothers for early initiation of breast feeding. • Ensure effective implementation of IMS act – Infant Milk Substitute act and Baby Friendly Hospitals.

Madhya Pradesh

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
5	Percentage of stunted children under 5 years	42%	Barwani (52%), Chhatarpur (43%), Damoh (43%), Guna (43%), Khandwa (44%)	<ul style="list-style-type: none"> • Ensure registration of all under five children in AWC. • Monthly weight recording of children at AWC on MCP card for detection of growth faltering and counselling of caregivers. • Implement Home based care of young child to improve complementary feeding. • Detection of children with growth and development delays and deficits and their referral as appropriate. • Micronutrient supplementation (IFA, Calcium and Vitamin A and deworming).
6	Percentage of children with ARI in the last 2 weeks taken to a health facility	71%	Rajgarh (68%), Singrauli (54%), Vidisha (66%)	<p>Prevention of ARI</p> <ul style="list-style-type: none"> • Promotion of exclusive breastfeeding. • Vaccination against HiB, PCV, Pertussis. • Use of clean fuels for cooking – Effective implementation of Ujjawala scheme. <p>Treatment of ARI</p> <ul style="list-style-type: none"> • Promotion of Integrated Management of Neonatal and Childhood Illnesses (IMNCI) for early diagnosis and case management of common ailments of children with special emphasis on pneumonia, diarrhoea and malnutrition. • Early detection and prompt treatment at community level by ASHA workers. • Availability of antibiotics with ANM and health facilities.
7	Percentage of children with Diarrhoea treated with ORS	55%	Barwani (54%), Chhatarpur (52%), Guna (51%), Singrauli (25%), Vidisha (33%)	<p>Prevention of diarrhoea</p> <ul style="list-style-type: none"> • Promotion of exclusive breastfeeding. • Clean and potable water for drinking. • Vitamin A supplementation. • Rotavirus vaccination. <p>Treatment of diarrhoea</p> <ul style="list-style-type: none"> • Awareness on ORS and Zinc for treatment of diarrhoea. • Availability of ORS at household level through campaigns like Intensified Diarrhoea Control Fortnight.

Madhya Pradesh

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
8	Percentage of Severe Acute Malnutrition	9%	Guna (12%), Singrauli (17%)	<ul style="list-style-type: none"> • Screen children for SAM using MUAC or WHZ as defined per protocol. • For all SAM children, identify cases with complications or failure of appetite test for immediate referral to Nutritional Rehabilitation Centres (NRCs) for inpatient care to Severe Acute Malnourished (SAM). • For all SAM cases without complications, provide community based management of SAM as per protocol. • Ensure strong coordination between NRCs and Community-based Management of SAM sites to ensure that no cases are lost during referrals or lost to follow-up.
9	Percentage of Moderate Acute Malnutrition (MAM)	26%	Barwani (28%), Guna (33%), Rajgarh (32%), Singrauli (34%)	<ul style="list-style-type: none"> • Screen children for SAM or MAM using middle upper arm circumference (MUAC) or Weight for Height Z-score (WHZ) as defined per protocol. • For children with MAM, provide double ration as per ICDS norms or appropriate hygienic energy dense food. • Identify the MAM child within in the AWC/ASHA network and provide special monthly follow-up for six months to ensure healthy growth and recovery.
10	Percentage of children fully immunized (9-11 months) (BCG+ DPT3 + OPV3 + Measles1)	53.6%	Barwani (41.8%), Chhatarpur (41.1%), Rajgarh (42.7%), Singrauli (42.2%), Vidisha (45.7%)	<ul style="list-style-type: none"> • Ensure vaccine availability and development of microplan using MCTS. • Special camp for reaching unreached children. • Engage all sectors in immunization activities. • Address vaccine hesitancy in selected population groups.
11	Other Priority Interventions			<ul style="list-style-type: none"> • Strengthen care around birth through LaQshya strategy and improve practices in labour room and SNCUs. • Health & Wellness Centres under Ayushman Bharat to be established on priority in aspirational districts by June 2018. • Ensure essential Drugs & Diagnostics free of cost in public health facilities. • Improve convergence between ASHA, ANM and Anganwadi Worker. • Strengthen monitoring – Use Data for evidence based action – particularly use HMIS data to identify low performing blocks using standard Health score card developed by MOHFW.

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
1	Percentage of Pregnant Women (PW) receiving four or more Ante-Natal Care (ANC) check-ups	72%	Nandurbar (53%), Washim (68%)	<ul style="list-style-type: none"> • Ensure availability and use of Urine pregnancy kit for early detection of pregnancy by ASHA. • Follow up and tracking of all mothers by ASHA using MCTS – denominator based monitoring. • Improve implementation of PMSMA and PMMVY. • Ensure regular VHNDs – microplanning at all VHNDs with availability of essential services, commodities and desired facilities.
2	Percentage of institutional deliveries	90.3%	Nandurbar (55.5%), Osmanabad (88.2%), Washim (84%)	<ul style="list-style-type: none"> • Mapping to identify pockets of high home deliveries, with especial emphasis on tribal population. • Improve registration under RCH portal with birth preparedness plan for all pregnant women. • Increase in number of delivery points, especially in areas with high home deliveries. • Improve community/client awareness on entitlements under and implementation of JSSK/PMMVY/JSY. • Improve quality of care and ensure respectful maternity care, including provision of Birth companion.
3	Anemia in Pregnant women	49%	Nandurbar (66%), Osmanabad (22%)	<ul style="list-style-type: none"> • Line-listing of all pregnant women with severe anemia. • IV Iron to be provided under supervision. • Ensure IFA supplementation to all pregnant women.
4	Percentage of stunted children under 5 years	34%	Nandurbar (48%), Osmanabad (43%), Washim (41%)	<ul style="list-style-type: none"> • Ensure registration of all under five children in AWC. • Monthly weight recording of children at AWC on MCP card for detection of growth faltering and counselling of caregivers. • Implement Home based care of young child to improve complementary feeding. • Detection of children with growth and development delays and deficits and their referral as appropriate. • Micronutrient supplementation (IFA, Calcium and Vitamin A and deworming).

Maharashtra

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
5	Percentage of children with ARI in the last 2 weeks taken to a health facility	85%	Nandurbar (73%), Osmanabad (71%)	<p>Prevention of ARI</p> <ul style="list-style-type: none"> Promotion of exclusive breastfeeding. Vaccination against HiB, PCV, Pertussis. Use of clean fuels for cooking – Effective implementation of Ujjawala scheme. <p>Treatment of ARI</p> <ul style="list-style-type: none"> Promotion of Integrated Management of Neonatal and Childhood Illnesses (IMNCI) for early diagnosis and case management of common ailments of children with special emphasis on pneumonia, diarrhoea and malnutrition. Early detection and prompt treatment at community level by ASHA workers. Availability of antibiotics with ANM and health facilities.
6	Percentage of Severe Acute Malnutrition	9%	Nandurbar (15%), Gadchiroli (22%), Washim (15%)	<ul style="list-style-type: none"> Screen children for SAM using MUAC or WHZ as defined per protocol. For all SAM children, identify cases with complications or failure of appetite test for immediate referral to Nutritional Rehabilitation Centres (NRCs) for inpatient care to Severe Acute Malnourished (SAM). For all SAM cases without complications, provide community based management of SAM as per protocol. Ensure strong coordination between NRCs and Community-based Management of SAM sites to ensure that no cases are lost during referrals or lost to follow-up.
7	Percentage of Moderate Acute Malnutrition (MAM)	26%	Nandurbar (40%), Gadchiroli (46%), Washim (33%)	<ul style="list-style-type: none"> Screen children for SAM or MAM using middle upper arm circumference (MUAC) or Weight for Height Z-score (WHZ) as defined per protocol. For children with MAM, provide double ration as per ICDS norms or appropriate hygienic energy dense food. Identify the MAM child within in the AWC/ASHA network and provide special monthly follow-up for six months to ensure healthy growth and recovery.

Maharashtra

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
8	Percentage of children fully immunized (9-11 months) (BCG+ DPT3 + OPV3 + Measles1)	56.3%	Nandurbar (32.8%)	<ul style="list-style-type: none"> • Ensure vaccine availability and development of microplan using MCTS. • Special camp for reaching unreached children. • Engage all sectors in immunization activities. • Address vaccine hesitancy in selected population groups.
9	Other Priority Interventions			<ul style="list-style-type: none"> • Strengthen care around birth through LaQshya strategy and improve practices in labour room and SNCUs. • Health & Wellness Centres under Ayushman Bharat to be established on priority in aspirational districts by June 2018. • Ensure essential Drugs & Diagnostics free of cost in public health facilities. • Improve convergence between ASHA, ANM and Anganwadi Worker. • Strengthen monitoring – Use Data for evidence based action – particularly use HMIS data to identify low performing blocks using standard Health score card developed by MOHFW.

Tamil Nadu

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
1	Percentage of Pregnant Women (PW) receiving four or more Ante-Natal Care (ANC) check-ups	81%	Virudhnagar (66%), Ramnathpuram(66%)	<ul style="list-style-type: none"> • Ensure availability and use of Urine pregnancy kit for early detection of pregnancy by ASHA. • Follow up and tracking of all mothers by ASHA using MCTS – denominator based monitoring. • Improve implementation of PMSMA and PMMVY. • Ensure regular VHNDs – microplanning at all VHNDs with availability of essential services, commodities and desired facilities.
2	Percentage of institutional deliveries	99%	Virudhnagar (96%)	<ul style="list-style-type: none"> • Improve registration under RCH portal with birth preparedness plan for all pregnant women. • Improve community/client awareness on entitlements under and implementation of JSSK/PMMVY/JSY. • Improve quality of care and ensure respectful maternity care, including provision of Birth companion.
3	Percentage of new-borns breastfed within one hour of birth	54.7%	Virudhnagar (48.8%), Ramnathpuram (42.9%)	<ul style="list-style-type: none"> • Ensure counselling and support to mothers for breastfeeding promotion during ANC period as part of Birth preparedness. • Staff sensitisation and capacity building at all delivery points. • Ensure presence of birth companion and trained labour room staff to support mothers for early initiation of breast feeding. • Ensure effective implementation of IMS act – Infant Milk Substitute act and Baby Friendly Hospitals.

Tamil Nadu

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
4	Percentage of stunted children under 5 years	27%	Virudhnagar (30%)	<ul style="list-style-type: none"> • Ensure registration of all under five children in AWC. • Monthly weight recording of children at AWC on MCP card for detection of growth faltering and counselling of caregivers. • Implement Home based care of young child to improve complementary feeding. • Detection of children with growth and development delays and deficits and their referral as appropriate. • Micronutrient supplementation (IFA, Calcium and Vitamin A and deworming).
5	Percentage of children fully immunized (9-11 months) (BCG+ DPT3 + OPV3 + Measles1)	69.7%	Virudhnagar (54.4%), Ramnathpuram (59%)	<ul style="list-style-type: none"> • Ensure vaccine availability and development of microplan using MCTS. • Special camp for reaching unreached children. • Engage all sectors in immunization activities. • Address vaccine hesitancy in selected population groups.
6	Other Priority Interventions			<ul style="list-style-type: none"> • Strengthen care around birth through LaQshya strategy and improve practices in labour room and SNCUs. • Health & Wellness Centres under Ayushman Bharat to be established on priority in aspirational districts by June 2018. • Ensure essential Drugs & Diagnostics free of cost in public health facilities. • Improve convergence between ASHA, ANM and Anganwadi Worker. • Strengthen monitoring – Use Data for evidence based action – particularly use HMIS data to identify low performing blocks using standard Health score card developed by MOHFW.

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
1	Percentage of Pregnant Women (PW) receiving four or more Ante-Natal Care (ANC) check-ups	26%	Bahraich (4%), Shravasti (8%), Fatehpur (10%), Balrampur (11%), Siddharthnagar (15%), Chitrakoot (16%), Sonbhadra (22%), Chandauli (25%)	<ul style="list-style-type: none"> • Ensure availability and use of Urine pregnancy kit for early detection of pregnancy by ASHA. • Follow up and tracking of all mothers by ASHA using MCTS – denominator based monitoring. • Improve implementation of PMSMA and PMMVY. • Ensure regular VHNDs – microplanning at all VHNDs with availability of essential services, commodities and desired facilities.
2	Percentage of institutional deliveries	67.8%	Bahraich (37.3%), Shravasti (48.4%), Balrampur (30.8%), Siddharthnagar (45.3%), Sonbhadra (57.4%)	<ul style="list-style-type: none"> • Mapping to identify pockets of high home deliveries, with especial emphasis on tribal population. • Improve registration under RCH portal with birth preparedness plan for all pregnant women. • Increase in number of delivery points, especially in areas with high home deliveries. • Improve community/client awareness on entitlements under and implementation of JSSK/PMMVY/JSY. • Improve quality of care and ensure respectful maternity care, including provision of Birth companion.
3	Anemia in Pregnant women	51%	Balrampur, Chandauli (55%), Chitrakoot (60%), Sonbhadra (52%)	<ul style="list-style-type: none"> • Line-listing of all pregnant women with severe anemia. • IV Iron to be provided under supervision. • Ensure IFA supplementation to all pregnant women.
4	Percentage of new-borns breastfed within one hour of birth	25.2%	Shravasti (18%), Siddharthnagar (19%), Bahraich (22.8%), Fatehpur (25.1%)	<ul style="list-style-type: none"> • Ensure counselling and support to mothers for breastfeeding promotion during ANC period as part of Birth preparedness. • Staff sensitisation and capacity building at all delivery points. • Ensure presence of birth companion and trained labour room staff to support mothers for early initiation of breast feeding. • Ensure effective implementation of IMS act – Infant Milk Substitute act and Baby Friendly Hospitals.

Uttar Pradesh

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
5	Percentage of stunted children under 5 years	46%	Bahraich (65%), Shravasti (64%), Balrampur (63%), Siddharthnagar (58%), Fatehpur (52%), Chitrakoot (51%)	<ul style="list-style-type: none"> • Ensure registration of all under five children in AWC. • Monthly weight recording of children at AWC on MCP card for detection of growth faltering and counselling of caregivers. • Implement Home based care of young child to improve complementary feeding. • Detection of children with growth and development delays and deficits and their referral as appropriate. • Micronutrient supplementation (IFA, Calcium and Vitamin A and deworming).
6	Percentage of children with ARI in the last 2 weeks taken to a health facility	71%	Bahraich (48%), Shravasti (54%), Fatehpur (65%), Siddharthnagar (67%), Sonbhadra (68%), Balrampur (68%)	<p>Prevention of ARI</p> <ul style="list-style-type: none"> • Promotion of exclusive breastfeeding. • Vaccination against Hib, PCV, Pertussis. • Use of clean fuels for cooking – Effective implementation of Ujjawala scheme. <p>Treatment of ARI</p> <ul style="list-style-type: none"> • Promotion of Integrated Management of Neonatal and Childhood Illnesses (IMNCI) for early diagnosis and case management of common ailments of children with special emphasis on pneumonia, diarrhoea and malnutrition. • Early detection and prompt treatment at community level by ASHA workers. • Availability of antibiotics with ANM and health facilities.
7	Percentage of children with Diarrhoea treated with ORS	38%	Shravasti (26%), Bahraich (34%), Siddharthnagar (35%), Fatehpur (36%), Sonbhadra (37%)	<p>Prevention of diarrhoea</p> <ul style="list-style-type: none"> • Promotion of exclusive breastfeeding. • Clean and potable water for drinking. • Vitamin A supplementation. • Rotavirus vaccination. <p>Treatment of diarrhoea</p> <ul style="list-style-type: none"> • Awareness on ORS and Zinc for treatment of diarrhoea. • Availability of ORS at household level through campaigns like Intensified Diarrhoea Control Fortnight.

Uttar Pradesh

Health & Nutrition Indicators with Action Points

S NO	INDICATOR	STATE	LAGGING ASPIRATIONAL DISTRICTS	KEY PROGRAMMES UNDER NHM AND ACTIONS
8	Percentage of Severe Acute Malnutrition	6%	Chitrakoot (15%), Chandauli, Sonbhadra (7%), Bahraich, Fatehpur (6%)	<ul style="list-style-type: none"> Screen children for SAM using MUAC or WHZ as defined per protocol. For all SAM children, identify cases with complications or failure of appetite test for immediate referral to Nutritional Rehabilitation Centres (NRCs) for inpatient care to Severe Acute Malnourished (SAM). For all SAM cases without complications, provide community based management of SAM as per protocol. Ensure strong coordination between NRCs and Community-based Management of SAM sites to ensure that no cases are lost during referrals or lost to follow-up.
9	Percentage of Moderate Acute Malnutrition (MAM)	18%	Chitrakoot (33%), Sonbhadra (23%), Chandauli (18%)	<ul style="list-style-type: none"> Screen children for SAM or MAM using middle upper arm circumference (MUAC) or Weight for Height Z-score (WHZ) as defined per protocol. For children with MAM, provide double ration as per ICDS norms or appropriate hygienic energy dense food. Identify the MAM child within in the AWC/ASHA network and provide special monthly follow-up for six months to ensure healthy growth and recovery.
10	Percentage of children fully immunized (9-11 months) (BCG+ DPT3 + OPV3 + Measles1)	51.1%	Balrampur (7.1%), Bahraich (9.4%), Shravasti (17.3%), Sonbhadra (30.3%), Siddharthnagar (35.3%), Fatehpur (48.4%)	<ul style="list-style-type: none"> Ensure vaccine availability and development of microplan using MCTS. Special camp for reaching unreached children. Engage all sectors in immunization activities. Address vaccine hesitancy in selected population groups.
11	Other Priority Interventions			<ul style="list-style-type: none"> Strengthen care around birth through LaQshya strategy and improve practices in labour room and SNCUs. Health & Wellness Centres under Ayushman Bharat to be established on priority in aspirational districts by June 2018. Ensure essential Drugs & Diagnostics free of cost in public health facilities. Improve convergence between ASHA, ANM and Anganwadi Worker. Strengthen monitoring: Use Data for evidence based action, particularly use HMIS data to identify low performing blocks using standard Health score card developed by MOHFW.
