

# Dakshata

## Recap of day two and review of partograph assignment

### Instructions

- Welcome the participants on the final day of the training.
- Start the session with a recap of key points discussed on day two. For recap play the game with ball. Pass the ball from one learner to the other and ask each to summarize one to two key points of one of the sessions from previous day. If a learner gives a wrong message or forgets any key information, ask other learners to raise their hands, who want to complete and give the correct information.
- Encourage learners to use the safe childbirth checklist during this time while discussing key points from previous day's sessions.
- For good and complete responses, compliment the learners.
- Clarify doubts if any from previous day's session.
- Review and discuss the partograph case studies assignment and ask the learners for any mistake or clarification they need regarding plotting and interpretation of the two cases. Assign sufficient time to assess the partograph home assignments while participants are arriving at the beginning of the day's session.
- Present the agenda of day three.
